Ahmedabad | +91 6353301927 | sameerjadav001@gmail.com | [LinkedIn](#) | [GitHub](#)

Skills

- JavaScript, TypeScript, Go (Golang), SQL
- React, Next.js, Express.js, Hono, Node.js, Tailwind CSS
- Docker, Git, GitHub, Linux

Experience

Fatality Studios — [Live](#)

- Created a high-performance music production website with Next.js. Achieved a perfect 100/100 on PageSpeed scores, even with heavy media content.
- Used UploadThing for efficient file management. This improved the site's performance with many high-quality audio files.
- Implemented advanced optimization for images and audio. This led to a 60% drop in page load time and a better user experience.

Projects

Guestbook — [Live](#) | [GitHub](#)

- Built a full-stack server-side rendering (SSR) web app using Next.js. It features GitHub authentication and a SQLite database.
- Implemented React Server Components (RSC) to enhance performance. Also, used TanStack Query for effective async state management.
- Achieved a perfect PageSpeed score of 100/100. This highlights my expertise in optimizing web performance for quick load times.

T3 Env (T3OSS) — [Live](#) | [GitHub](#)

- Fixed critical bugs in the documentation site for the t3-env open-source project.
- Resolved frontend issues with Tailwind CSS, improving UI/UX across the site.
- Demonstrated skill in Next.js and Tailwind CSS while working on a complex Turborepo setup. Collaborated effectively on this large-scale project.

Education

- Harvard University (edX) — *CS50: Introduction to Computer Science*
- GLS Institute of Commerce (GLSIC) — *Bachelor of Commerce*
